

Prioritizing Solutions

Integrated Primary Care in Medicaid & CHIP

January 25, 2024 | 1:00 – 2:00pm EST

OPENING SPEAKER

Stephanie Glier, MPH

Director of Federal Advocacy
American Academy of
Pediatrics

@ Our Campaign

Better Health *NOW*

A campaign of  pcc primary care collaborative

We are 50+ organizations strong, collectively calling for better health NOW across all communities in the U.S. and recognizing that **primary care** is a big part of how we get there.

Our Top 2 Priorities for Medicaid

The **Better Health – NOW** campaign calls on federal policymakers to pursue two immediate Medicaid -related policy goals:

Support state Medicaid and CHIP programs in offering well designed population -based payment models that include enhanced investment in primary care and strong alignment of payment and measurement across payers.

Promote and equip primary care to integrate whole -person health , especially integrated behavioral health care.

How CMS Can Realize These Goals

Provide guidance on population -based
primary care payment models

Prioritize primary care - behavioral health
integration

Promote continuity of coverage and care

Track primary care access and investment

Develop Medicaid/CHIP CMMI models
